Empty Wt.	1,325 lbs.	Premium leather seats
Gross Wt.	2,300 lbs.	Cleveland wheels
Useful Ld.	975 lbs.	

This is a very clean example of the launch edition X-cub, by CubCrafters. The aircraft does have "damage history", a ground loop which contacted the RH wing leading edge, but was repaired by using a complete new factory RH wing. No component currently installed on this aircraft was damaged. Last compressions were 78, 79, 77, 76. It has been stored in a hangar, in fact the hangar at Merrill Field is available with the sale of the airplane for additional.
