SERIAL NO 15074824

ElT replaced by Jan 92

IMPORTANT NOTICE

Dear Owner:

system(s) and sensitive altimeter instrument(s) be inspected every two (2) erated in controlled airspace under IFR. years in accordance with Part 43, Appendix E, if the aircraft is to be op-Federal Aviation Regulation Part 91. 170 requires that the static pressure

accomplished during instrument and aircraft assembly, this date may be a formed on your static system(s) and altimeter(s). Because these tests are Certificate maximum of twelve (12) months prior to the date on your Airworthiness The entry in your aircraft log lists the date on which this test was per-

Inspection to minimize aircraft con time. subsequent test and inspection periods will coincide with an Annual In following this recommendation, a schedule will be established whereby

Address

FORM P121-13

the static system(s) and altimeter(s) at your first Annual Inspection.

Because of this difference, Cessna recommends that you retest and inspect

### EXCERPT FROM THE FEDERAL AVIATION REGULATIONS

### NOTE

Since the following excerpt is subject to change, a periodic check of the latest FAR, Part 91 should be made to insure that adequate maintenance records are being kept.

"FAR 91.173 Aircraft and Engine Maintenance Records. The registered owner or operator shall maintain a maintenance record in a form and manner prescribed by the administrator which shall include a current and accurate record of the total time in service on the aircraft and on each engine, a record of inspections, and a record of maintenance required by Part 18 of this sub chapter. Such records shall be:

- "(a) Presented for required entries each time inspection or maintenance is accomplished on the aircraft or engine,
- "(b) Transferred to the new registered owner or operator upon disposition of the aircraft or engine involved, and
- "(c) Make available for inspection by authorized representatives of the administrator or board."

### INSTRUCTIONS FOR THE USE OF THIS LOG BOOK

All required data must be entered in the proper columns regularly. The column headed REMARKS is particularly important, for in that column must be entered the following information:

- 1. A record of all Line and Periodic inspections and results.
- A record of all accidents in which the aircraft is involved, whether major or minor. All entries covering alterations or repairs to aircraft or propeller shall be endorsed by the certificated mechanic responsible for same, including his rating and certificate number.
- 3. A record of rigging changes; all repairs and alterations to aircraft or propeller; changes in engines or propellers; and a record of operation of both installed, and also prior to installation.
- 4. When repairs or alterations to aircraft or propeller necessitate submission of FAA Form ACA 337 (Repairs and Alterations) the original of this form shall be incorporated in the back of this book, and become a part thereof; and each such incorporated form shall be noted in the REMARKS column.
- 5. A record of all repairs to instruments used on certificated airline aircraft.
- Chronological listing of compliance with service bulletins, airworthiness directives, etc., including a description of the method of compliance.

MAKE ALL ENTRIES WITH PEN AND INK-MAKE NO ERASURES.
