Useful Ld.	1,600 lbs.	Seaplanes West HD engine mount
P/CP BAS shoulder harnesses	K & N air filter	Oregon Aircraft heat shields
ART wing extensions	Cessna 2 nd seat stop	ABI 26" Bushwheels
ACS key ignition switch	BAS tail pull handles	ABI 3400 Baby Bushwheel
Hartwig fuel cells	F&M engine oil filter	New gear axle bolts

Barn find! Here it is a late model NO DAMAGE HISTORY Cessna A185F. Wing extensions are about the only airframe modification, very much like condition when she was delivered from the factory. Recent maintenance items include new Hartwig fuel bladders, new engine control cables, new wheels, brakes, tires, and axle bolts. The engine was ported, polished, and flow matched when overhauled by Victor. And it's been stored for past many years in a climate controlled, heated hangar. Definitely worth a drive-by look.
