 HOBBIS: 4598.2

Airframe Entries

(1) Completed Annual Inspection in accordance with manufacturer's recommendations and a checklist conforming to Title 14 Code of Federal Regulations Chapter 43, Appendix D. (2) Completed left engine 100 hour inspection in accordance with the manufacturer's recommendations and a checklist conforming to Title 14 Code of Federal Regulations Chapter 43 Appendix D Compression check: #1-70/80, #2-75/80, #3-68/80, #4-74/80, #5-78/80, #6-70/80. Cleared, gapped and tested spark plugs. Checked ignition timing. Cleared engine. (3) Completed right engine 100 hour inspection in accordance with the manufacturer's recommendations and a checklist conforming to Title 14 Code of Federal Regulations Chapter 43 Appendix D Compression check: #1-76/80, #2-74/80, #3-20/80, #4-20/80, #5-75/80, #6-74/80 (see items 24 & 25). Cleared, gapped and tested spark plugs. Checked ignition timing. Cleared engine. (4) Completed left propeller 100 hour inspection in accordance with the manufacturer's recommendations and a checklist conforming to Title 14 Code of Federal Regulations Chapter 43 Appendix D. Denickled blades. (5) Completed right propeller 100 hour inspection in accordance with the manufacturer's recommendations and a checklist conforming to Title 14 Code of Federal Regulations Chapter 43 Appendix D. Denickled blades. (6) Complied with AD 82-28-05 "Rudder Balance Weight Rib" by inspection in accordance with the text of the AD and Cessna SLE MEB-82-R. Inspection due again in 100 hours. (7) Complied with AD 2000-01-16 "Defect and Correct Cracks in the Exhaust System" by inspection of the left and right engine exhaust systems in accordance with paragraphs (b), (c) and (e). Paragraph (b) due every 50 hours or 30 days whichever occurs later. Paragraphs (c) and (e) due every 12 calendar months. (8) Complied with AD 2004-25-18 R1 by inspection of the Cabin Heater Fuel Pressure Regulator and Shut-off Valve. No leaks noted. Inspection due again in 100 hours. (9) Complied with AD 2004-21-05 "Cabin Heater Pressure Decay Check" by pressure decay check of the heater core and operational check of the air pressure switch. No defects noted. Heater hobbs time on 10-9-2023 is 693.8. (10) Complied with AD 2016-07-24 "Flight Control Elevator Trim Control Rod Hardware Inspection" by inspection of the elevator trim control rod hardware in accordance with the text of the AD and Cessna MEB 27-02. Inspection of hardware for condition and proper hardware is due every 100 flight hours. (11) AD 2023-02-12 "Superior Intake Valves" does not apply to left or right engines. No record of intake valve replacement during affected time period. (12) AD 2023-05-16 "Counterweight Retaining Rings" does not apply to left or right engines. No record of counterweight retaining ring replacement since engine overhauls in 1998 & 1999. (13) AD 2023-17-04 "Strut Oil Filter Adapter Gasket" does not apply to left or right engine. Affected component not installed. (14) AD 2023-09-09 "Spot-Welded, Multi-Segmented V-Band Clamps" does not apply to left or right engines. Affected clamps not installed. (15) The ACK Model E-04, s/n 022964 ELT system installed in this aircraft was inspected and tested according to the applicable ELT manufacturer's instructions and the requirements of 14 CFR 91.207(d) and was determined to be in an airworthy condition. **ELT BATTERY EXPIRES APRIL 2024.** (16) Changed left engine oil and filter. Installed 10 quarts of Phillips 20W-50 oil and Tempest AA48108-2 filter. Inspected removed filter. No contamination. Cleared engine. Performed engine ground run. Operational and leak check satisfactory. (17) Changed right engine oil and filter. Installed 10 quarts of Phillips 20W-50 oil and Tempest AA48108-2 filter. Inspected removed filter. No contamination. Cleared engine. Performed engine ground run. Operational and leak check satisfactory. (18) Inspected left engine air induction filter assembly P12-8158. Next filter change due Aug 2024 or 5050.0 Hobbs. (19) Inspected right engine air induction filter assembly P12-8158. Next filter change due Aug 2024 or 5050.0 Hobbs. (20) Installed new left, right and aux fuel cap seals. (21) Cleaned and treated delco boots with Goodrich products for longevity. (22) Removed, disassembled, cleaned and inspected left main wheel assembly. Greased wheel bearings. Installed new Goodyear Flight Customer III 6.50X10-8 ply tire and customer supplied inner tube. Reassembled and installed left wheel assembly. (23) Installed new left engine exhaust tail pipe K9910299901. (24) Removed left engine #3 cylinder due to low compression 40/80. Disassembled, cleaned and inspected. Installed new exhaust valve guide. Ground valve seats. Installed new intake and exhaust valves. Lapped valves to seats. Reassembled valves and bench checked 80/80 psig. Cleaned and inspected piston and pin. Installed new pin. Installed new rings for chrome bore cylinder. Reinstalled cylinder with new gasket set. Performed engine ground run. Operational and leak check satisfactory. (25) Removed left engine #4 cylinder due to low compression 20/80. Disassembled, cleaned and inspected. Installed new exhaust valve guide. Ground valve seats. Installed new intake and exhaust valves. Lapped valves to seats. Reassembled valves and bench checked 80/80 psig. Cleaned and inspected piston and pin. Installed new pin. Installed new rings for chrome bore cylinder. Reinstalled cylinder with new gasket set. Performed engine ground run. Operational and leak check satisfactory. (26) Installed new o-rings on left engine wastegate oil line fittings.

The aircraft identified herein was inspected in accordance with an ANNUAL INSPECTION, found to be in an AIRWORTHY condition and approved for return to service.
